## 1 Wstęp

### 1.1 Cel projektu

$$\bar{x}_N = \left[ \bar{x}_{SA} + \sum_{(j)} \Delta \bar{x}_{SAj} + \bar{z}_s \cdot \left( 2 \cdot C_z \left( \frac{1}{\pi \cdot \Lambda_e} - \frac{1}{a} \right) - \alpha_0 \right) + \kappa_H^0 \cdot \frac{a_1}{a} \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) \right] \cdot K_{ghN} \quad (1.1)$$

• środek stateczności ze sterem puszczoneym:

$$\bar{x}'_N = \left[ \bar{x}_{SA} + \sum_{(j)} \Delta \bar{x}_{SAj} + \bar{z}_s \cdot \left( 2 \cdot C_z \left( \frac{1}{\pi \cdot \Lambda_e} - \frac{1}{a} \right) - \alpha_0 \right) + \kappa_H^0 \cdot \frac{a_1}{a} \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) \left( 1 - \frac{a_2}{a_1} \frac{b_1}{b_2} \right) \right] \cdot K_{ghN'} \quad (1.2)$$

• środek sterowności ze sterem trzymanym:

$$\bar{x}_M = \left[ \bar{x}_{SA} + \sum_{(j)} \Delta \bar{x}_{SAj} + \bar{z}_s \cdot \left( 2 \cdot C_z \left( \frac{1}{\pi \cdot \Lambda_e} - \frac{1}{a} \right) - \alpha_0 \right) + \kappa_H^0 \cdot \frac{a_1}{a} \left( \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) + \frac{a}{\mu_1^0} \right) \right] \cdot K_{ghM} \quad (1.3)$$

• środek sterowności ze sterem puszczoneym:

$$\bar{x}'_M = \left[ \bar{x}_{SA} + \sum_{(j)} \Delta \bar{x}_{SAj} + \bar{z}_s \cdot \left( 2 \cdot C_z \left( \frac{1}{\pi \cdot \Lambda_e} - \frac{1}{a} \right) - \alpha_0 \right) + \kappa_H^0 \cdot \frac{a_1}{a} \cdot \left( 1 - \frac{a_2}{a_1} \frac{b_1}{b_2} \right) \left( \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) + \frac{a}{\mu_1^0} \right) \right] \cdot K_{ghM'} \quad (1.4)$$

gdzie:

$$K_{ghN} = \frac{1}{1 + \frac{S_H}{S} \cdot \frac{a_1}{a} \cdot \left( \frac{V_{H\infty}}{V_\infty} \right)^2 \cdot \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right)} \quad (1.5)$$

$$K'_{ghN} = \frac{1}{1 + \frac{S_H}{S} \cdot \frac{a_1}{a} \cdot \left( \frac{V_{H\infty}}{V_\infty} \right) \cdot \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) \cdot \left( 1 - \frac{a_2}{a_1} \frac{b_1}{b_2} \right)} \quad (1.6)$$

$$K_{ghM} = \frac{1}{1 + \frac{S_H}{S} \cdot \frac{a_1}{a} \cdot \left( \frac{V_{H\infty}}{V_\infty} \right)^2 \cdot \left( \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) + \frac{2a}{\mu_1^0} \right)} \quad (1.7)$$

$$K'_{ghM} = \frac{1}{1 + \frac{S_H}{S} \cdot \frac{a_1}{a} \cdot \left( \frac{V_{H\infty}}{V_\infty} \right)^2 \cdot \left( 1 - \frac{a_2}{a_1} \frac{b_1}{b_2} \right) \cdot \left( \left( 1 - \frac{\partial \varepsilon}{\partial \alpha} \right) + \frac{2a}{\mu_1^0} \right)} \quad (1.8)$$
